**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 08/01/2005, the applicant's attorney, Glenn M. Kubota (Reg. No.: 44,197) requested an extension of time for 2 MONTH(S) and authorized the Director to charge Deposit Account No. 03-1952 the required fee of \$450 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

**In the claims:** claims 39 and 41 have been cancelled.

[End of Amendment]

**NOTE:** the above amendment has been made in order to put the application in condition for allowance by canceling claims 39 and 41.

***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 6, 15, 19, 20, 25, 34 and 38, the previous art of record teaches of a system comprising a network and at least one mobile station (MS), means and processor for enabling communications with the at least one MS, the at least one MS having a connection with the network that is capable of becoming a potentially failing connection and the system for executing a rescue procedure for rescuing the

potentially failing connection upon detection of the potentially failing connection, a method for computing a mean rescue transmission output power level of a MS having a potentially failing connection, the method comprising: determining a mean rescue receive power level for the MS when the MS begins transmitting during the rescue procedure; and computing the MS's mean rescue transmission output power level by adding a delta power level to a negative of the mean rescue receive power level, the delta power level inherently including an offset representing open-loop power control. In addition, the previous art of record teaches of a delta power level. However, the previous art of record fails to teach where **the delta power level includes a pre-rescue power delta computed by subtracting the MS's mean receive power level from the MS's transmit power level, the MS mean receive power level and the MS transmit power level measured at a time power control bits were received by the MS prior to detection of the potentially failing connections the pre-rescue power delta including the offset.**

Claims 2, 9-14; 7-8; 16-18; 20-21, 28-33; 26-27 and 35-37 are depend upon claims 1, 6, 15, 19, 20, 25, 34 and 38; therefore, the examiner gives the same reasons for allowance as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
